Yes there are many car and track-mods on Server 1 - 7.
The easiest way to get the content is to download and install the SBB-Autoupdater.
You just need to define the path of your AC folder and an folder for the downloaded cars and tracks in the Updater and it will do all the work for you.

_____

Have you downloaded the lastest version of the updater? Sounds like you have an older version installed that doesnt update anymore.

Delete current version "autoupdater" you`re using and download newest version manualy (Downloads/Gizmos/Auto Updater)

Should work accurate afterwards.
Best regards B)
