Hello drivers!

You want to plan your own events which we will drive on our servers? You now have the possibility to do so!

What you need to keep in mind:

Variety

There shouldn't be the same car or the same track every week. We need some variety!

Choice of cars

You should choose a car group (GT3, GT2, Group C etc.) or cars that fit together.

Choice of tracks

The track should fit to the chosen car.

For example, Abarth 500 on LeMans is not very interesting.

Testing

After that, you have to test everything.

Test your event online on a server for working pitstops etc!

Poster

We only can create an analysis of the events if there is a poster available.

You can paint your own poster or get it painted by me (Repa24). In that case, send me a message.

Finally you can send your suggestions to hutto or to Repa24.. We will then give you feedback about the event and tell you if it will take place or not. ;)

You're having questions about tyre-wear, fuel-consumption, calculation of number of laps etc.? Cruise can help you!

Regards,

Repa24 (engl. Support) & the SBB-team
