## Assetto Corsa Nürburgring 24h Replay Cameras

Geschrieben von vjjeonlsa - 06.09.2015 09:35

---

Hi,

"Back in the beginning of July, I came across this interesting video. I had it set aside and forgot all about it.

While we all appreciate the work of modding teams when it comes to free cars and tracks content, we often forget the hard work that goes into the smaller modding projects such as physics enhancements, skins, UI mods and more.

One of the underestimated parts of Sim racing modding must be Track Camera creation. It might not be rocket science to set up some virtual cameras, but now and then we come across a modded set that is created with lots of hard work and dedication.

The Assetto Corsa replay camera file featured in the included video is a perfect example of the dedication that went into this seemingly modest mod. This replay camera mod for the Assetto Corsa Nürburgring Nordschleife track mimics the exact camera setup as used in the real Nürburgring 24h race.

To install, simply copy & paste the included content folder into your Assetto Corsa Steam folder. (At this time it is not clear who to credit for the work. Should you know the author, let us know.)"
