Problems During Checksum

Posted by Pena - 2017/09/30 19:59

_____

That's the message I get when trying to sign in SBB server???
I think it's related to the thing that I updated the "iron" in my pc.
Also I, naturally, had to install Windows again.
I changed the name of my pc also, could that be the problem?
Auto-downloader seems to work in my pc, after it asked my name and password.

_____

Hi

Have you in the Updater also the correct path to the Assetto Corsa intsallation specified. If not, then the mods are installed incorrectly and one does not come on the SBB server.

Path is "..: \ Steam \ SteamApps \ common \ assettocorsa"

greeting
dIrtY

_____

Thx Dirty for your answer.
I've checked and double checked everything.
Paths are correct. Everything should be in order, but???
The only thing I found was in the folder where are the downloader downloads. There was two files one with my old PC name and another with new, I deleted the old one, but it made no change. I still get the same error when trying to go to SBB server.:(

_____

server 9 has only original Kunos Content without dlc running.
maybe you had not the dlcs required or the trackmods (maybe not the server version) running on the other servers and this gives you the checksum error.

_____

Thank you Seelenkrank for answer.
I have Porsche I-III, Red Pack, Japanese Pack , Dream Pack 1 DLC's.

Doesn't seem to be enough...:whistle:
Haven't paid much of intention to the DLC's, just bought them with a feeling.
Well, ok, gotto go shopping.;)
TY all.

_____

it is even important to have all the tracks if a mod running on a server.
even if its not running yet the game checks if you have the content running on it.
you can get all the stuff running here with the auto updater ->
http://www.schwarzbierbude.de/component/option,com_remository/Itemid,26/func,select/id,146/lang,de/
(or manual dl vom the menu on the left)

_____

checksum error cant join event @lemans superfast,

im up2date , have all dlc
i tryed offline lemans 1.2 with ferarri superfast
works fine

Trying autoupdater re-install now

im also using the rennsimulanten updater lately
maybe not a bright idea...
