_____

After some difficulties here I am registered here!
With the many races at your neighbors, there is not much time ;) . In general I have a great preference for old (I heal myself !!;)), so I hope to do some race with you ...:)

What content do you need to run with you?
I have the Porsche pack 1 and the dream pack 2

Sorry to not speak your language, I'm French and although my mother was German I only have about 10 words in this language:unsure:

Hello,
you need all Assetto packs to drive all the cars.
In addition, you must install the Autoupdater and update everything.
Then everything should work.

greetings Uwe
