Hello, is it Assetto Corsa or Assetto Corsa Competizione ???
If I have Assetto Corsa, where can I find your server?
Thank you.

On the SBB homepage only the server with the Toyota GT86 (in the right modules). In the game, search for "schwarz" under "Online". More of our servers will be displayed to you, but will be shut down at the end of January. With us, everything takes place only in the ACC.
sry for my english

Auf der SBB Homepage nur der Server mit dem Toyota GT86 (in den rechten Modulen). Suchen Sie im Spiel unter "Online" nach "schwarz". Weitere unserer Server werden Dir angezeigt, aber werden Ende Januar abgeschaltet. Bei uns findet alles nur in ACC statt.

Do you need any mods to play Assetto Corsa "Toyota GT86"?
I have not found an auto-updater for Assetto Corsa, only for Competizione!
Thanks!

No mods needed! For certain routes, the paid DLCs are also required.

Not Updater for ACC, nur downloads

Updater AC http://www.schwarzbierbude.de/component/option,com_remository/Itemid,26/func,fileinfo/id,44/

Unfortunately, we can no longer keep the mods in it up to date. Because we don't have an admin for it.

"Ãœber uns" now also in : "About us"
