## Assetto Corsa 1,1 DLC content vs Bierbude

Geschrieben von sgtprobe - 12.03.2015 14:37

---

So, we now have the official DLC content for Assetto Corsa, and it's awesome. The Green Hell is so awesome I don't even know where to begin describing it's awsomeess.

Unfortunately, I had to remove all my car mods to make it work, otherwise it just stod there on the loading menu, trying to do something with the cars.

I guess it was the same for the rest of you, and bierbude, since all servers are offline.

Now, it seems, some mods do work, some doesn't. But the big question is, how will the autoupdater going to fix this mess? It must be a massive task fixing all those mods. I see that there is a activity in the German part of the forums here, but unfortunately, I'm not that good with the German language.

Is there any solution being discussed etc. I'm so eager to do some online racing on the new Nord! :P

Thanks!

/Jonas

Hi

it seems that there is a hotfix for most cars. Didn't try it yet.

AC Mod Fix (from racedepartment)

[http://www.mediafire.com/download/hqfx9hx1q6noow/AC\\_MODS\\_FIX\\_V1.1.rar](http://www.mediafire.com/download/hqfx9hx1q6noow/AC_MODS_FIX_V1.1.rar)

Greetings

cheer up! SBB-Admins will solve this, for sure.

Best and easiest solution to all of us would be, if Auto-Updater will get new content with all modded cars being adopted to new AC 1.1.

So all we had to do is waiting for this and running the Auto-Updater = ready to go ;)

Unfortunately Admin Uwe (DerDumeklemmer) is on holidays righth now, so this is also the reason for our SBB-servers being "offline" as Admin Moritz1998 told me today (sure he deserves his days off) B)

Ah, yeah, of course he deserves his days off. :)

Being so awesome and all, making this whole awesome community up and running, autoupdater and all, I'm really gratefull for all the hard work they do.

---

Thanks for the heads-up!

Cheers!

/Jonas

ps.

Anyone else noticed the improved FFB with the new update/DLC? For me it's like a whole new sim experience, soo much better :)

ds.

Yes it's true, i have an awesome FFB now with my DrivingForce GT and the old setting. Recognized it on the first few meters with the Nissan:woohoo:

But i had to set it down to 80% with racecars. With Streetcars i tested i had to set it up to 110%:side:
